

## General Changes for the APP and Admin user-

- Plans----> All plan titles should be in Caps (1<sup>st</sup> initial only)
- Plans----> Duration 12months (it should be specific as its written only number 12) cross check in APP also.
- Plans----> All Plans description will be edited from our end (Teknix team)
- Service Masters----> Services----> Customer Unique Job Number (Title to be changed to Customer Job Number or only Job Number)
- Service Master---- Services (it takes time to load the page)
- Master----> Passenger Capacity----> All the numbers should be in consecutive order (Cross check in APP also)
- Hold on Reasons--- Will add from our end (Teknix team)
- Forward Reasons--- Will add from our end (Teknix team)
- Closed ticket Reasons--- Will add from our end (Teknix team)
- Raised Tickets for customer--- Will add from our end (Teknix team)
- While logging in Admin user the home page is blank. Is it blank on purpose or you will be adding in there some content or can we add Dashboard page as a default page while logging in. (Need to discuss with Lalit uncle and Parth)
- When clicking on the 3 line (On top left corner) Teknix logo isn't appearing, as for now Teknix name is been there and only T and half of E is been displayed (I will send video through whatsapp)
- Product Statuses--- Title should be changed to Product Status.
- Masters---> Problems (as discussed with Hitesh, this tab is for Customer side) Change the title to Reasons for Customers or we can discuss with Lalit uncle and Parth and update later.
- Settings---> Plan Price title to be changed to Price Plan. Pricing will add from our end (Teknix team)
- Backup Teams----> Title to be changed to Technician teams (Need to discuss with Lalit uncle and Parth)
- Payment History---> Instead of Order ID can we change the name to Offer number. (Need to discuss with Lalit uncle and Parth) Or is Order number for your reference for the APP purpose.
- Payment History ---> Can we filter it? For instance we want to see only Part Payments payment history then can we just see that bit (for admin and user purpose only)
